

Neighborhood Meeting #3 – Meeting Summary

DPW does a great job with plowing in the Turkey Run area – never have a problem getting out

Thank you for holding these meetings

What can the Town do to improve broadband service throughout town? How to provide equal access?

When will the Riverwalk be continued further downstream along the river?

When will the Bike Path be constructed?

There is a drainage problem at Ward Road across from Country Lane – flooding and icing

Meadow Road has no capacity for pedestrians or bicyclists – can it be widened, or even have shoulders paved?

Town Meeting participation is low – if town is being well run, then nobody will show up

What can the Town do about abandoned homes? Burned out home on Meadow Road, and an abandoned one on West Wind Road should be taken down

What can the Town do about “sale” signs that pop up all over the place – same size as campaign signs, but advertising businesses

The area behind Pejepscoot is a not a good idea – the Town should do whatever it can to support Grimmel’s plan to build a road to Rt. 196

Very poor cell service in Pejepscoot area

Thank you for holding these meetings

What can we as residents do to prohibit plastic bags from retail stores?

How can we get the Town involved in working on eliminating plastic bags? Ban them? Recycle them?

What can the Town do about a stagnant stream that runs under West Wind? Could be a health issue. Is it blocked downstream?

The Town has dropped the ball on the old Fire Station in Lower Village and the bridge that was taken down.

What can we do about the dismantled bridge that is still sitting there?

You asked for areas that the Town can improve – construction management. We have had issues in the Turkey Run area with construction timing, days of the week, loose material blowing around, wetlands being filled.

About the stream under West Wind – that used to be a marshy area that was filled, and it fed into a pond. There was a culvert under a road into an old gravel pit that has raised blocking flows.

How is Town going to handle the replacing of the Frank Wood Bridge? Will it be moved or done in place?

The Town has done a good job with Natural Resource Planning.

The Fairgrounds are a great asset to the Town, but are underutilized – attended Oktoberfest there and saw a lot of potential for them to be used more

The Board should consider quarterly Neighborhood Meetings

Where is there a schedule for what is shown on Channel 3?

Is the Town going to have a public Strategic Planning process?

The Town should look at land use rules governing forestry operations in setbacks and buffer areas, particularly where commercially zoned land abuts residentially zoned land

I hope the Town will continue to have an open planning and development process

I urge caution in assuming that more commercial development will result in lower property taxes

I would like the budget process to hold the line on taxes

The Town should take a hard look at every position and determine whether it is still needed or not

We cannot accede to excessive union demands and retain unproductive or non-essential positions
